

MBS Summer School 2026, Module 1:

Doing Business in Germany - Mindset and Market Dynamics in Europe's Largest Economy

Content:

This module provides participants with a comprehensive overview of doing business in Germany, exploring the cultural, economic, and policy-related factors that shape the German business environment. Through interactive sessions, business cases, and discussions, participants will gain insights into Germany's regulatory framework, business culture, communication styles, and key industry trends. In addition, the module examines the specific German mindset, financial behaviour, regional differences, social characteristics, and consumer behaviour that influence both corporate practices and market dynamics.

The module emphasizes practical application, enabling participants to connect theoretical understanding with real-world business scenarios. By the end of the module, participants will work in teams to design and present a **market expansion strategy** for a real or fictitious company seeking to enter or grow within the German market. This final project will demonstrate their ability to analyse market opportunities, navigate cultural differences, and develop actionable strategies tailored to the German context. These skills will, while having been developed with a focus on the German market, be relevant to participants within a broader international context.

Learning outcomes:

By the end of this module, participants will be able to:

- Understand the key cultural dimensions influencing business practices in Germany.
- Identify major economic, political, and regulatory factors affecting market entry.
- Evaluate market opportunities and challenges for foreign businesses in Germany.
- Develop and present a comprehensive market expansion strategy tailored to the German business environment.

Prerequisites:	A basic understanding of business foundations is helpful
Contact hours:	30
