

Digital Consultant (Technology Advantage) Consulting Track

WHO WE ARE

BCG has a long history of driving growth by embracing innovation and new ways of thinking. Through DigitalBCG, we bring together a diverse mix of consultants and digital specialists to ensure that we are supporting our clients throughout their digital transformation journeys. We work with our clients to fully understand the impact of digital on their business and set priorities that will transform their vision into value. Whether it be developing new technologies to support their core business, making better use of their data, or pursuing entirely new sources of revenue, our aim is to achieve radical improvements in productivity, flexibility, and speed. We are innovating how our clients are using artificial intelligence, robotic process automation, internet of things, and blockchain technologies to gain competitive advantage.

DigitalBCG encompasses a broad set of data, digital, and technology capabilities from BCG consulting teams and practices, along with our business units such as BCG Digital Ventures, BCG Platiniion, and BCG GAMMA.

There are few business decisions today that do not involve technology. In BCG Technology Advantage, you would use your expertise and generalist consulting skillset to help CEOs and their teams solve their most pressing challenges, and think about how digital and technology will change the shape of their business.

You would help your clients answer questions such as “How will AI disrupt my business model?”, “What will be the effect of this technology policy on the economic growth?”, “How can I ship higher quality digital services to my customers faster by using agile?” and much more.

WHAT YOU’LL DO

As a Consultant, you will be given end-to-end responsibility within a BCG project, and begin to develop specialized knowledge to help you solve our clients’ problems. You’ll work closely with clients to understand their issues, create strategies for change, win buy-in for your recommendations, and collaborate with fellow BCGers to transform client potential into performance.

A broad skillset and passion for technology is important. As part of our Technology Advantage consulting team, you would work on a variety of technology topics, applying generalist consulting skills to strategic technology questions. You will be supported by an extensive training curriculum (the same programme as all BCG consultants), plus technology-specific training and mentoring to help you build your skills.

YOU'RE GOOD AT

Professional skills

- Able to work creatively and analytically in a time-limited, problem-solving environment
- Good business sense
- Independent and autonomous judgment
- Have a strong consulting skillset: hypothesis-led problem solving, framing and communicating complex ideas, thinking strategically
- Have a track record for thinking innovatively

Personal Attributes

- Flexible, curious and creative, open for new things and able to propose innovative ideas
- Team player, open, pleasure to work with and positive in a group dynamic
- Able to build empathy within the firm and win the trust of the clients
- Intercultural competence and experience of working in more than one country and/or multi-cultural teams
- Driven, hard-working, entrepreneurial, proactive and productive
- Willing to travel and to work on client sites
- Excellent communication skills

YOU BRING (EXPERIENCE & QUALIFICATIONS)

We're looking for exceptional talent from consulting or industry to join us. You would typically:

- Have up to 6 years of experience working:
 - with a leading consulting firm (focused on technology/digital initiatives);
 - in a client-facing IT role in a large corporate (e.g. business analyst);
 - in a tech start-up leadership role; or
 - in a "consulting-like" industry (e.g. digital strategy)
- Have an outstanding academic track record
- Have an advanced degree in Electrical, Mechanical, Industrial or Computer Engineering, Computer Science, Physics or Mathematics – graduate of a renowned university would be a plus
- Excellent written and spoken German and English, other languages would be of added benefit
